

Press release

China Stamp

We are proud to announce that ACO Engineering A/S has acquired the Manufacture License of Special Equipment People's Republic of China Pressure Vessel (SELO).

It is with great satisfaction that ACO Engineering A/S is announcing that we have undergone the SELO Audit. As a result of this, we are now in the mix of a few exclusive companies in Denmark, who are able to produce and sell pressure equipment directly to the Chinese market.

China is a new but familiar market for ACO Engineering A/S and it is currently undergoing rapid growth within our industry. Therefore, this certification creates many new and exciting prospects for the company. With that in mind, it is our hope and expectation, that this certificate will be a helpful asset for future revenue generation and competitiveness improvement - for both ACO Engineering A/S and our collaborators.

In addition, we have also renewed our American ASME certification, which is often demanded when working with international projects for pressure equipment.

ACO Engineering A/S looks forward to using these certifications in a marketing purpose as well as in our cooperation with both Danish and foreign engineering firms and Contractors.
