

# Tanks

## WITH INTEGRATED COOLING AND HEATING JACKETS

### TANKS

ATHCO-Engineering dimensions, designs and manufactures stainless steel tanks for every purpose.

ATHCO-Engineering has specialized in dimensioning, design and manufacture of tanks that has particular demands on them. The tanks are all made from stainless steel materials.

The tanks that hold products that require heating or cooling are equipped with jackets made from thermo plates, as they are an integral part of the casing.

The tank, including the jacket is designed and calculated according to PED, ASME or SELO, and ATHCO-Engineering will support all necessary documentation.

### PRODUCT ADVANTAGES

- Integrated cooling/heating system
- Low maintenance cost
- Compact design and simple installation
- Long life due to stable and durable corrosion
- resistant materials

### FIELDS OF APPLICATION

- All tanks with cooling or heating requirements
- For example in food, chemical, wood, paper
- and textile industries
